EXPERIENCE THE ART OF LINEAR WALLING

ATLAS STONE is a range of large-scale linear stone strips in varying sizes to cover expansive wall areas of residential and commercial buildings.

The wider, longer format of this series allows the stone's inherent qualities to express themselves fully - from sprawling ancient mineral formations to subtle tonal variations, this new larger format system showcases natural stone at its finest.

ATLAS Stone Veneer Specs

Built to generous scale, ATLAS yields a breathtaking and expansive style. At 31.5" in length, each tile stretches well beyond typical finish dimensions found in the stone industry, ensuring that each project using ATLAS will stand out. We show ATLAS in a staggered format, however each tile set is supplied as 3 loose strips so patterns and staggers are unique to each installation.

Unit Dimensions	Weight	Coverage
One SET: 31.5" Long x 3.1" / 2.4" / 5.5" Tall	12.5 lbs/sq ft	2.4 sq ft/set
Thickness: 0.8" Thick
